

Medical PPE: Polycarbonate Face Shields by *Exiscan*

Face Shields:

- Manufactured to Johns Hopkins Specifications
- Polycarbonate Face Shield (1/16" thick)
- Thermoformed to contour around sides of face
- Shield covers entire face as PPE to protect medical staff from potential contagions
- When used properly it protects the N95 mask, so that N95 can be re-used
- Shield can be wiped down and be re-used
- Wide elastic headband is adjustable and conforms foam pad to forehead
- Headband and foam removable for easy cleaning
- Foam Pad holds shield 2" from forehead giving comfortable distance for glasses and face

Exiscan LLC:

- Manufacturer of industrial safety products
